Is your child interested in science, technology, engineering, and/or math? If so, he or she should consider applying to the Earhart-Edison Exploration Academy (E2) at North Hall Middle School.

E2 students demonstrate growth and mastery of the Georgia standards through technology-based projects and authentic intellectual work. Students also engage in creative problem solving projects related to their school and community. Students are immersed in an environment of STEM exploration that emphasizes service-learning, career exploration and leadership development.

The E2 Academy's goal is to prepare students for advanced programs at the high school level such as the NHHS STEM or ATLAS academies, AP courses, the International Baccalaureate Programme, and/or dual enrollment opportunities.

Questions: Contact E2 Coordinators Kimberley Nash and Katie Olson
